DANIEL LI

Electrical and Computer Engineering Student

The University of Texas at Austin

RESUME DRAFT

EDUCATION

The University of Texas at Austin

Electrical and Computer Engineering student

TECHNICAL SKILLS

CAD & mechanisms: Onshape, FRC turret / shooter / indexing design, FRC elevator design

Manufacturing: Fusion 360 CAM, OMIO X8 CNC router, toolpaths, setup, machine operation

Embedded systems: Arduino, wheel encoders

ENGINEERING PROJECTS

FRC Turret, Shooter & Indexing System

Onshape | FIRST Robotics Competition

Independently designed the turret, shooter, and indexing system in Onshape using reference designs.

FRC Elevator Mechanism

Onshape | FIRST Robotics Competition

Designed an FRC elevator mechanism in Onshape.

CNC Machining

Fusion 360 CAM | OMIO X8 CNC Router

CNC machining work covering toolpath preparation, setup, and machine operation.

Science Olympiad Electric Vehicle

Arduino | Wheel Encoders

Electric Vehicle project using Arduino and wheel encoders.

Engineering Design Training

Robotics | 7-8 Week Program

Engineering design training program for new robotics members.

Draft based on supplied project information. Contact details, dates, and additional credentials are not yet included.
